Helm CONNECT: Compliance
Meet Audits

Manage your entire audit process from beginning to end, including non-conformities and corrective actions.

- Build custom audit templates
- Schedule and track your internal and external audits with our easy-to-use audit dashboard
- Manage your list of findings and assign each one a corrective action
- Manage all the corrective actions resulting from forms or audits completed in Helm CONNECT
- Maintain a full history of all completed audits, including associated findings and corrective actions

"When they [auditors] ask to see the training, I can just pull up one individual and show them all their training for the entire year right in their personnel file, along with all their certifications that they may have asked to see like a TWIC card, MMC, radio or radar license. Everything is right in there and we can see if it is validated or not."

- ***Erin Pugh***
  Compliance Coordinator,
  Tug and Barge Solutions
