**Helm CONNECT: Jobs**

Meet Logbook

The evolution of the paper-based logbook.

Helm CONNECT Logbook is an essential addition to the Jobs module that allows for automated record keeping of all events on a vessel. Helm CONNECT Logbook offers several benefits over traditional logbooks:

- **Easy Access.** Available anywhere, at any time, as long as you have internet access. This allows for easy collaboration and sharing of information among team members.
- **Automated Compliance.** Automatically track and alert users to safety and compliance checks, ensuring your vessel is always up to code.
- **Increased Accuracy.** Eliminate the risk of human error that can occur with paper-based logbooks, such as misreading handwriting or transposing numbers.
- **Better Organization.** Easily search, sort, and filter data, making it simpler to find the information you need quickly.
- **Cost-effective.** Save money by reducing the need for paper, ink, and other supplies while eliminating manual data entry, which can be time-consuming and error-prone.
- **Enhanced Security.** Password-protected and consistently backed up, your data is always safe and secure.
