**Helm CONNECT: Jobs**

Meet Dispatch

Plan, schedule, and dispatch your jobs, then track and review the work done by your assets in real time.

> Stay in constant communication with your assets while they're on the job

> Manage your orders and assets in a time bar or in a compact, data-driven grid

> Automatically convert estimated times to actuals as critical order times are logged by your crew

> Use templates to streamline your most commonly performed tasks

> Use flexible grid layouts and powerful custom fields to record and view only the information relevant to your organization

"

"We switched over to Helm because it is the most user friendly vessel operations software program I have come across and I think we have demoed or used in combination all of them. We also chose Helm because they seem to have the best support."

– John Stewart
Vice President,
Magnolia Fleet
